Leaky Bodies
Daniela Gutmann

The title “Leaky Bodies” refers to bodies understood as porous, permeable, and always in exchange with their surroundings (a key concept in Astrida Neimanis’ feminist posthuman phenomenology, *Bodies of Water* (2017)).

The exhibition approaches water both as a physical-sensory body and as a relational system that connects human and non-human actors. The exhibition space itself functions as a stage, a scene in which bodies, materials, and narratives interact. The focus is on linking the water-related ecological crisis with embodied phenomena and speculative fiction, conceived as an experiment with wetness and fluidity.

Whilst the exhibition and the performance differ in terms of their duration, they are equally important.
